

Netgem Presents Next Generation TV At CommunicAsia2010

Paris, France, May 28th, 2010: Netgem (<http://www.netgem.com>), a leading provider of IPTV technology and applications to operators worldwide, will present its comprehensive vision of the future of IP-delivered services at next month's CommunicAsia2010 (<http://www.communicasia.com/main.htm>) show in Singapore (**stand 3L1-12**).

Addressing the needs of both incumbent Telcos and alternative operators running bandwidth-constrained or unmanaged IP networks, Netgem's intelligent and award-winning middleware, NetgemTV and Netbox collection, combine the best of broadcast and broadband technologies into one, seamless TV experience.

Commenting on the company's participation at CommunicAsia2010, Netgem's Managing Director, Christophe Aulnette said: "The rapid development of Asia's Telecommunications and Media sectors provides Telcos with opportunities to create new and innovative TV services that maximise their networks and increase ARPU."

CommunicAsia2010, the most established technology (ICT) event in Asia, it will be held at the Singapore Expo from 15 – 18 June 2010.
