

develop the FUTURE OF TV

DEVELOP THE FUTURE OF TV

Netgem is a pure-play hybrid broadcast and broadband IPTV company, providing innovative technology, expertise and flexible business models that enable telecom operators, worldwide, to develop breakthrough, value-added convergence services.

BENEFITS

Netgem hardware and software solutions enable operators to stand out in an increasingly competitive market, attract and retain customers, reduce CAPEX/OPEX and increase ARPU.

- **Proven and trusted:** Netgem technologies are robust and scalable, having demonstrated their mass-market readiness with over to 2.5 million hybrid broadcast/IP set-top boxes deployed at Tier 1 operators around the world.
- **The Wow! effect:** NetgemTV software offers a breakthrough HD user interface with 3D display effects that is fast, attractive and easy to use. NetgemTV allows operators to engage with their audiences, contributing to increase loyalty and reduce subscriber churn.
- **Cost effective:** Netgem's solution is highly optimized, thanks to its innovative client and server middleware and set-top box design. Netgem's hybrid technology, progressive download and adaptive streaming features dramatically increase the geographical reach of potential viewers, while not requiring additional network CAPEX investments for operators.
- **Stimulating innovation:** Thanks to its commitment to open standards, Netgem provides operators and application developers with a Software Development Kit (SDK) that enables the customisation of the user interface and the fast delivery of innovative Internet-enabled services.
- **Available now!** Netgem's hybrid broadcast/IP solutions are available "off the shelf" in volumes, ready to be integrated into provisioning, billing, CRM and content protection systems, thus helping accelerating time to market for operators.

NETGEM SOLUTIONS

With Netgem, telecom and cable operators can offer an advanced, branded viewer experience which seamlessly integrates the best of broadcast TV, VOD, Internet and home content into one, attractive and easy-to-use TV experience.

SOFTWARE

NetgemTV is our next-generation open standard hybrid IPTV **middleware software platform** that features a highly visual and intuitive user interface and robust backend architecture. NetgemTV is optimized to deliver the best experience on Netgem's Netbox receivers.

Netgem  TV

HARDWARE

8000 SERIES

7000 SERIES

5000 SERIES

The **Netbox series** are designed to address a broad range of operator needs, including advanced multi-tuner PVR set-top boxes. Making use of the latest HDTV chipsets and components, Netgem hybrid broadcast/IP receivers are modular, allowing operators to select the most suitable combination of storage, connectivity, network protocols, number of tuners, content protection technology and remote control options to deploy innovative offerings.

ABOUT NETGEM

Netgem, thanks to its unique blend of skills in the fields of television and telecoms, has played a key role in the development of IPTV in France. With over 2.5 million HD hybrid set-top boxes currently deployed worldwide, Netgem is one of the pioneers and leaders of the IPTV market. Founded in 1996 with the vision to open the TV world to the Internet contents, Netgem has been listed on Euronext Paris since 2000 and was admitted on the SBF 250 index in 2009.
